## MEDIA RELEASE

### Local Environment, Health & Safety Training Consulting Company Features Leading Canadian Firm in its 2008 Learning Series

#### For Immediate Release

January 7, 2008, London, Ontario

**Tavares Group Consulting continues to grow an environmental, health and safety presence with its course offerings in southwestern Ontario.**

London owned Tavares Group Consulting Inc. has joined forces with Deloitte, a leading Canadian professional services firm, to offer the southwestern Ontario region its *2008 Learning Series featuring Deloitte*. The four-session series will assist with the integration of business practices among environment, health & safety (EHS) issues.

The training series is targeted toward EHS coordinators, quality and risk managers, accountants, human resources professionals and senior managers from any size organization.

“In today’s world of heightened social consciousness, companies and organizations aiming at long-term profitability and enhanced credibility recognize that EHS awareness and training initiatives are essential to the sustainability of an organization,” says Sandra Tavares, Principal of Tavares Group Consulting Inc. “The goal of the *Learning Series featuring Deloitte* is to demonstrate EHS integration and its importance to other disciplines within the business organization.”

“The *Learning Series* provides an opportunity for participants to gain access to Deloitte’s interdisciplinary professionals and understand how EHS matters to the bottom line of sustainable organizations,” Tavares adds.

The four sessions cosponsored with Tavares Consulting Inc. will be held at Sunningdale Golf and Country Club in London. The breakfast sessions include the following:

March 5, 2008 – *Best Practices in Health & Safety*

April 8, 2008 – *Management Systems Integration and Optimization*

May 6, 2008 – *Risk Management for EHS Liabilities*

June 4, 2008 – *Corporate Responsibility/Sustainable Development: Economy or Environment?*

“Having an effective environment, health and safety plan is not just about managing and mitigating risks,” explains Joe Solly, a senior manager with Deloitte’s Corporate Responsibility & Sustainability practice.

“It’s about taking a strategic approach and aligning EHS activities with the organization’s business plan. Doing so can not only affect the environment and employee and customer well-being, but can positively impact the organization’s bottom line.”
